

Pesticide Management Tips

Utilize Integrated Pest Management (IPM) Practices while controlling insects and rodents.

Don't invite pests into your Home

Caulk, weatherstrip and seal openings in walls, doors and windows

Keep vegetation and wood mulch at least 1 foot away from structures

Don't feed pests

Keep your home clean of trash

Keep areas dry by fixing leaky drains and faucets, removing water and wet materials

Never leave food, crumbs or trash uncovered in your home. Don't leave uneaten pet food out overnight

Use a trash can with a tight lid. Avoid placing your trash can under the sink. Empty the trash frequently

Safely and correctly use pesticides

Follow the pesticides label's instructions

Store pesticides and other household chemicals out of children's reach in their original container

Use up entire contents of pesticide container prior to disposal

When possible, use baits, traps and low risk pesticides
